Our Mission

Committing to all our customers to provide best professional services in the area of quality management system, product certification and intellectual property in compliance of our values of intelligence, sincerity and professional competency

Our philosophy is:

"Give your best to the world, and the best would come back to you ..."

Royal Consultants philosophy has always been based on the premise that real development can only be accomplished through well organized and productive organizations managed by capable personnel at all levels. This philosophy has provided the guidelines for the strategy that has directed Royal Consultants mission from the start of its operation, building the organizational Identity based on our commitment, professional culture and values.

RC mission & philosophy is to improve the operational effectiveness of our clients by developing solutions and building the internal capability of our clients. We provide best-in-

class, realistic solutions that result in profitability and long-term sustainability. RC provides live, real-time strategies with integrated actions that can be rapidly executed.

The new economy demands new business models and tools, as well as new approaches to doing business. Corporations are seeking innovation and speed to capture market opportunities and meet new challenges.

ISO Certification Advantages

The International Standards ISO 9000, describe how companies can implement quality

system. Once a system is in place, it may be certified by an independent institution. The certificates can be used to show customers that company adheres to externally verified quality standards.

Quality Assurance

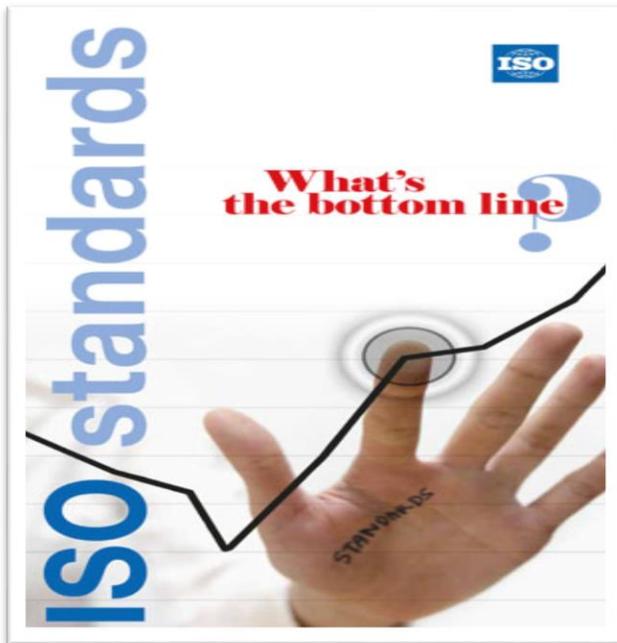

The Quality Management System - Requirements, is widely used by organization around the world to demonstrate that they have clearly defined and well managed set of processes that enable them to consistently provide products that meet customer and applicable statutory and regulatory requirement. The value of certification is the degree of public confidence and trust that is established by an impartial and competent assessment by a third-party.

Furthermore, advantages exist in the development and acquiring of ISO Certification. The most prominent example of a certified management standard, ISO 9000, was created by the International Organization for Standardization. It specifies requirements for a quality management system in order to demonstrate that the facility can "provide products that consistently meet customer and applicable regulatory requirements" (ISO, 2002).

In-fact, International Standards brings technological, economic and societal benefits. They help to harmonize technical specifications of products and services making industry more efficient and breaking down barriers to international trade. Conformity to International Standards helps reassure consumers that products are safe, efficient and good for the environment.

Consumer Protection

ISO certification prevents larger interest of consumer and protects their demands.

International Standards help improve quality, enhance customer satisfaction and increase sales as well improve market credibility and shares in markets.

International Standards bring technological, economic and societal benefits. They help to harmonize technical specifications of products and services making industry more efficient and breaking down barriers to international trade. Conformity to

International Standards helps reassure consumers that products are safe, efficient and good for the environment.

Management Satisfaction

International Standards are strategic tools and guidelines to help managements of the companies tackle some of the most demanding challenges of modern business. They ensure that business operations are as efficient as possible, increase productivity and help companies' access new markets. Through ISO certification companies would be able to improve their products quality, reduce cost, and improve operational activities, access to new markets, new market environment and sales shares. Thus improve the

overall production sales in the market resulting management satisfaction. SO has 20,000 standards touching almost all aspects of daily life. When products and services conform to International Standards consumers can have confidence that they are safe, reliable and of good quality. For example, ISO's standards on road safety, toy safety and secure medical packaging are just a selection of those that help make the world a safer place.

EXPERTS
